Innovative glass for a better world

Born in **1825** in the heart of the town of Arques, **in the north of France, Arc** is the world leader in tableware. For nearly two centuries, the Group's history has been forged through **countless innovations**, with the same leitmotiv, whatever the period: to offer, over the years, **more beautiful, more practical, more resistant, more versatile**, healthier and always more affordable products and services.

Every day the Arc Group produces more than **4.3 million items**, half of which leave its factory in Arques in the North of France.

All the articles produced by the Arc Group are made of glass.

Infinitely recyclable, insulating, non-flammable and resistant, **glass** is by definition **a sustainable material**.

The Arc Group has long been aware of environmental issues and has been committed for several years to a process that promotes the **circular economy**, by striving, for example, to **natural resources**, or to integrate **sustainability criteria** into the design of its products and offerings.

In many countries, single-use plastic containers will soon be banned (Egalim law in France). To support these changes, the Arc Group's marketing and R&D teams have developed **durable, reusable and returnable glass containers**, specifically designed for restaurants, takeaways and deliveries. In addition to being made of glass, **a healthy material that guarantees organoleptic quality and health safety**.
